Formulated quaternary disinfectant

Detergent disinfectant for the food process and animal husbandry Industries. Ideal for single or two stage clean and disinfection programs.

- Passes EN 14476; effective against enveloped viruses, including Coronavirus.
- Bactericidal; passes EN 1276. Effective against Listeria and Campylobacter.
- Effective against a wide range of pathogenic micro-organisms.
- Effective in All water conditions.

Food Process Industry

For use in the food process industry, this formulated quaternary disinfectant should be applied at a dilution rate of 1.0% v/v (10ml per L). For Coronavirus, Dilute 200ml per 5L Water (1:25) and follow the two stage cleaning process.

Single Stage Clean & Disinfect

Gross Soiling should be removed before applying the solution by clean cloth, brush or by immersion. Leave for 10-15 minutes then rinse, with clean, potable water.

Two stage Clean & Disinfect

Following throughout cleaning using a suitable detergent and rinsing with clean water, it should be applied by clean cloth, brush, immersion or by high/low pressure spray. Leave for 5-15 minutes then rinse with clean water.

Animal Husbandry Industry

For us in Animal Husbandry Industry, it should be applied at a dilution rate of 2.0% v/v (20 ml per L).

Two stage clean and disinfect

Following through cleaning using a suitable detergent and rinsing with clean water, it should be applied by clean cloth, brush, immersion or high/low pressure spray. Allow to air dry.

Product Information

Appearance: Clear Colorless Liquid

Odour: unperfumed

PH – undiluted: 13.3

Shelf Life: 3 years

Composition: Contains a blend of quaternary ammonium compound, sequestering agent and nonionic surfactant.

License No. 171240
