Glutaraldehyde-based general purpose disinfectant

Powerful disinfectant which offers protection from a wide range of disease causing micro-organisms.

- DEFRA Approved (Foot & Mouth, Poultry & General Orders).
- Has a rapid action against bacteria, yeast & viruses in the presence of organic matter.
- Suitable for use in livestock housing & associated equipment as part of a biosecurity program to aid in the prevention & spread of disease.
- Prolonged residual activity.

Effective against a wide range of organisms including the following:-

Bacteria: Brachyspira hyodysenteriae, Bordetella bronchiseptica, Campylobacter Jejuni, Corynebacterium pseudotuberculosis, Enterococcus faecalis, Escherichia coli, Haemophilus parasuis, Klebsiella pneumonia, Leptospira interrogans, Mycoplasma hyopneumoniae, Pasteurella multocida, Proteus vulgaris, Pseudomonas aeruginosa, Salmonella arizonae, Salmonella enteritidis, Salmonella gallinarum, Salmonella pullorum, Salmonella typhimurium, Staphylococcus aureus, Streptococcus suis.

Fungi: Candida albicans, Aspergillus brasiliensis.

Viruses: African Swine Fever, Aujeszky's Disease, Avian adenovirus, Avian influenza, Foot & Mouth Disease Virus, Hepatitis B & C, HIV, Infectious Bronchitis, Infectious Bursal Disease, Infectious Laryngotracheitis, Marek's Disease Virus, Parvovirus, Porcine Circovirus, Porcine Influenza (H1N1), Porcine Reproductive & Respiratory Syndrome (PRRS), Porcine Rotavirus, Swine Fever, Newcastle Disease, Paramyxovirus

Poultry House Disinfection:

Adjust dilution to suit soil level and/or disease specific history of the house - to between 50 and 190 parts of water. For application as a foam, apply at a dilution of 1:50 using a suitable foam applicator. Remove portable equipment and clear the house of litter, manure and dust, including that clinging to beams and trusses. Power wash the area using a solution of Power gel. Disinfect all contact surfaces by spraying with the disinfectant solution. After equipment has been re-installed, rest the house for as long as possible, and before re-stocking, consider aerial fogging as a further safeguard against infection.

Feed & Water Containers:

Thoroughly scrub loose equipment and feed and water containers in a solution at a dilution of 1:250. If scale is present the articles may be soaked in a solution of Milk stone Remover at a dilution of 1:20. The equipment is then disinfected by soaking in a solution of the product a dilution of 1:190 for 30 minutes. Allow to dry in a clean place before re-installing.

Drinking Water System:

Drain the system and flush with clean water. Fill the system with a solution of the product at a dilution of 1:190 and leave in contact for 30 minutes. Drain and rinse the system thoroughly with clean water until all traces of the disinfectant have been removed.

Product Information

Appearance: Clear Colorless Liquid

Odour: Pungent glutaraldehyde

PH – undiluted: 1.7

Shelf Life: 3 years

Composition: Contains a blend of glutaraldehyde, quaternary ammonium compounds, phosphoric acid, nonionic surfactant & dyes.

License No. 171240
